December 18, 1995

Dear Reader:

CRIME IN MONTANA - 1994 ANNUAL REPORT is prepared by the Statistical Analysis Center for the Montana Board of Crime Control. Crime Statistics are important bench marks revealing trends, patterns and clues to the future of crime in Montana. The Montana Uniform Crime Reporting (MUCR) system, the National Incident Reporting System (NIBRS), and the Juvenile Probation Information System (JPIS) are the vehicles which afford the state and the nation information on crime.

This year additional time was spent working with law enforcement agencies to ensure their data was complete and accurate. Time was also spent gathering data from some agencies which have not participated in the past or which did not submit data for 1993. The 1994 crime data included in this publication is the most complete, up-to-data, and accurate information available on crime in Montana.

All reporting is voluntary; therefore, we must recognize and thank all those people in the field who contribute to making this publication possible. It should be noted that the 1993 data may not have been as complete as the data for 1994. This may account for some of the offense counts appearing low in 1993. For the most part, the totals for 1994 continued the trend of previous years.

Again, we thank all those people who gathered and reported data throughout the year, but also those who worked so closely with us in the past few months to enhance the quality of this report.

Sincerely,

Ellis E. Kiser,
Executive Director

Data used in the preparation of this publication was compiled by the

staff of the

Statistical Analysis Center

of the

Montana Board of Crime Control.

The Board of Crime Control thanks all the local law enforcement contributors for the thousands of hours they give to data entry.

Without the local contributor, this document would not be possible.

Thank you!

GENERAL CRIME STATISTICS FROM THE MONTANA UNIFORM CRIME REPORTING PROGRAM

Overview and Introduction

This report contains the most complete, up-to-date, and accurate information currently available about crime in the State of Montana. It is intended to address the informational needs of law enforcement administrators, planners, legislators, and local government officials.

The data and statistics presented below are initiated primarily by the police departments and sheriff offices throughout the state. These agencies provide basic information about each crime which is reported to them and about each arrest they make to the Montana Uniform Crime Reporting (MUCR) system. In turn, the MUCR program feeds data into the Federal Bureau of Investigation (FBI) national Uniform Crime Reporting (UCR) program.

The number of reporting agencies can fluctuate from year to year. This accounts for some of the fluctuation in the number of offenses reported. A better measure of the trend would be a comparison of the crime rate rather than the number of offenses. A considerable amount of additional time was spent this year in compiling the 1994 data. Overall, more agencies are reporting with more accuracy.

It is emphasized that the amount and type of crime reported in this document is based upon the number of reported offenses and does not measure those offenses unknown to the law enforcement community. Many crimes, for example, may go unreported because the victims are unaware they have been victimized or have themselves been participants in illegal activity.

At the same time, many sociological and environmental factors influence the type and volume of criminal activity in a particular geographical area. These include the density and size of the community, demographic characteristics of the populations, the economic status of the population, educational, recreational, and religious characteristics of the population, effective strength of local law enforcement agencies, policies of prosecuting officials and the courts and public attitudes toward laws and law enforcement. Many of these are beyond the ability of local law enforcement agencies to control.

Nearly 80% of Montana's law enforcement agencies reported to the MUCR program in 1994. This covers about 95% of Montana's population.

INCIDENCE OF MAJOR CRIMES IN MONTANA 1985-1994

State Crime Index

Because of their serious nature, their frequency of occurrence and the reliability of their reporting, the crimes of willful homicide, forcible rape, robbery, aggravated assault, burglary, larceny/theft, and motor vehicle theft are used as a gauge with which to measure the amount of crime and how much it increases or decreases over time. The *crime index* is the total number of these offenses that come to the attention of law enforcement agencies.

In 1994, a total of 38,768 major crimes was reported to law enforcement officials in Montana. This number represents a 13% increase from 1993 to 1994; however the increase is partly due to an increase in the number of agencies reporting to the Montana Uniform Crime Reporting (MUCR) system. From 1990 through 1994, the average growth in major crime was nearly 4% per year. This is a reversal in the trend compared to the 1980s when major crimes decreased an average of 1.6% per year.

Increases were reported in all seven of the major crimes; homicide, rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft.

STATE CRIME RATE 1985-1994

The *crime rate* of a given area is defined as the number of index crimes per 100,000 population. By using rates per population, comparisons can be made between jurisdictions of unequal populations. It should be noted that the rate only takes into consideration the population factor and does not incorporate any of the many other elements which may contribute to the amount of crime reported in a given community.

The 1994 population figures used to calculate the state's *crime rate* have been provided to the MUCR program by the U. S. Bureau of Census through the FBI. In 1994, Montana's population was estimated to be 856,000. The population of reporting jurisdictions was 819,653 which is about 96% of the state total.

In 1994, Montana's *crime rate* was 4,730 major crimes per 100,000 population, based on reporting jurisdictions. This reflects an average increase in the *crime rate* of 1.3% per year over the past five years. For the most part the number of offenses has been increasing as the population of Montana increases. This reflects the slight increase over the past five years. When comparing Montana's crime rate to national statistics, the state's *crime rate* is about 14% lower.

In 1994, twenty-two percent of the total offenses reported were solved, being cleared by arrest. Of the \$19.5 million of property lost, \$4.5 million were recovered for an overall recovery rate of 23%.

HOMICIDE

Homicide is the willful, non-negligent killing of one human being by another. It includes murder and non-negligent manslaughter, but does not include justifiable homicide where an offender is killed by a police officer in the line of duty or a felon killed during the commission of a crime by a private citizen.

In 1994, a total of 30 homicides were reported in the state compared to a revised total of 29 reported in 1993, and only 17 reported in 1992. Since 1980 there were only two years where homicides were as high as in 1994. In 1981 and 1984 there were 40 and 36 homicides respectively. In 1990 the total equaled the 1994 count of 30 homicides.

Of the 30 homicides reported in 1994, 17 were reported as cleared by arrest. There may be many more cleared by arrest by the time of this printing. Montana's homicide rate for 1994 was 3.7 homicides per 100,000 population. The nation's comparable rate for 1994 was 9.0.

FORCIBLE RAPE

Rape is the carnal knowledge of a female forcibly and against her will. Both assaults and attempts to commit rape by force are included in this definition. Statutory rape (without force) and sexual assaults against males are classified as sexual offenses and are not counted under this classification.

A total of 270 cases of rape and attempted rape was reported to Montana law enforcement officials in 1994. This was a 50% increase over the 1993 count of 179. From 1990 through 1994, Montana has experienced an average increase of 18% per year in reported rapes.

Much of the increase is due to better reporting between the rape crisis centers and law enforcement, and more agencies participating in the Montana Uniform Crime reporting program. There are many variables involved that make it difficult to try to attribute the increase to any one factor.

Nearly twelve percent (12%) of the rapes were reported as cleared by arrest in 1994. This compares to a rate of thirteen percent (13%) for the previous year.

The 1994 incidence of rape in Montana was 33 forcible rapes or attempts per 100,000 persons compared to 23 in 1993, and about 15% lower than the national (1994) rate of 39.

ROBBERY

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or the threat of force or violence and/or putting the victim in fear. Robbery is a crime in which the element of personal confrontation between the victim and offender is present. Attempts to rob are included in the robbery count.

A total of 202 cases of robbery and attempted robbery was reported to Montana law enforcement officials in 1994. This reflects an increase of 9% from 1993's count of 186.

Twenty-five percent (25%) of the reported robberies were reported as cleared by arrest in 1993. The clearance rate for 1993 was 28%. The national clearance rate in 1994 was 24%.

The 1994 incidence of robbery in Montana was 25 robberies per 100,000 persons. This is considerably less than the national (1994) rate of 238.

AGGRAVATED ASSAULT

Aggravated assault is the unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon, or by means likely to produce death or great bodily harm. Any assault which does not involve the use of a weapon and does not result in serious injury is classified as a simple assault and is reported under a separate crime category.

A total of 986 cases of aggravated assault and attempted aggravated assault was reported to Montana law enforcement officials in 1994. This is considerably higher than the total reported in 1993 of 788. In part, the increase is due to more law enforcement agencies reporting to the Montana Uniform Crime Reporting (MUCR) program.

About forty-five percent (45%) of the reported aggravated assaults were cleared by arrest or by exception in 1994. The national clearance rate in 1994 was 56%.

The 1994 incidence of aggravated assault or attempts in Montana was 120 per 100,000 persons, which is only 28% of the national (1994) rate of 430.

BURGLARY

Burglary is the unlawful entry of a structure to commit a felony or theft. The theft of items from a building is classified as burglary if it is accompanied by a breaking or unlawful entry (trespass) without breaking. If the building is open to the general public and the offender has legal access, it is considered a larceny.

A total of 5,099 cases of burglary and attempted burglary was reported to Montana law enforcement officials in 1994. This was a 3% increase over the previous year's count of 4,943. As can be seen in the graph above, burglaries have remained somewhat stable over the past three years.

Nearly ten percent (10%) of the reported burglaries were cleared by arrest in 1994, while 13% were reported as cleared by arrest in 1993. The national clearance rate in 1994 was also 13%.

The 1993 incidence of burglary in Montana was 622 forcible burglaries or attempts per 100,000 persons, which is only slightly lower than the 1993 rate of 634. This is only sixty percent (60%) of the national (1994) rate of 1,042.

LARCENY/THEFT

Larceny is the unlawful taking, carrying, leading or riding away of property from the possession or constructive possession of another. Larceny includes such crimes as pickpocket, purse snatching, shoplifting, theft from motor vehicles, and theft from buildings where forced entry is not involved. It does not include embezzlement, "con" games, forgery, or bad checks. Similarly motor vehicle theft is not included in this category since it is considered a major crime by itself.

A total of 30,176 cases of larceny and attempted larceny was reported to Montana law enforcement officials in 1994. From 1990 through 1994, an average annual increase of five percent (5%) in reported larcenies is reflected in the chart above.

Just under nineteen percent (18.5%) of the reported larcenies were cleared by arrest in 1994. This is similar to the proportion cleared in 1993 when it was 20%. Montana's 1994 clearance rate is 1.5% lower than the national clearance rate in 1994 of 20%.

The 1994 incidence of larceny in Montana was 3,682 larcenies per 100,000 persons, compared to 3429 in 1993. This is about 20% higher than the national (1994) rate of 3,025.

MOTOR VEHICLE THEFT

Motor vehicle theft is defined as the theft of or attempted theft of a vehicle which is self-propelled and runs on the surface and not on rails. It includes automobiles, trucks, buses, vans, motorcycles, and snowmobiles. It does not include motorboats, construction equipment, airplanes and farming equipment.

A total of 2,005 cases of motor vehicle theft and attempted motor vehicle theft was reported to Montana law enforcement officials in 1994. This reflects a considerable increase over the 1993 count of 1602, and reverses the downward trend since 1991.

Twenty-five percent (25%) of the reported motor vehicle thefts were cleared by arrest in 1994. This is slightly lower than the 29% rate cleared in 1993. The national clearance rate in 1994 was 14%.

The 1994 incidence of motor vehicle theft in Montana was 245 motor vehicle thefts or attempts per 100,000 persons. The national (1994) rate is more than twice the Montana rate at where it totals 591.

DRUG ABUSE VIOLATIONS

Drug abuse involves the unlawful possession, sale, use, cultivation, and manufacturing of controlled substances and narcotic drugs.

A total of 2,893 cases of drug abuse and attempted drug abuse was reported to Montana law enforcement officials in 1994. The 1993 count was about 30% lower at 2191. From 1990 through 1994, there has been an average annual increase of about 20%.

Of the 2,893 drug abuse violations in 1994, nearly 75% were reportedly cleared by arrest

The 1994 incidence of drug abuse in Montana was 353 drug abuse cases or attempts per 100,000 persons as compared to 281 per 100,000 in 1993.

The major increases in drug offenses over the past five years could more than likely be attributed to the efforts of the drug task forces.

SEX OFFENSES

Sex crimes include offenses against chastity, common decency, morals, and the like. Montana law lists four specific crimes: sexual assault, deviate sexual conduct, indecent exposure and incest. Excluded under this category are forcible rape, prostitution and commercial vice.

Sex offenses have remained somewhat stable over the past ten years. A total of 1,450 cases of sex offense and attempted sex offense was reported to Montana law enforcement officials in 1994. The 1994 total is only 34 lower than the previous nine-year average of 1484.

Of the 1450 sex offenses reported to law enforcement, only 213 or 15% were reported as being cleared by arrest. This compares to twenty-two percent (22%) reported in 1993.

The 1994 incidence of sex offenses in Montana was 177 sex offenses or attempts per 100,000 persons which is about 10% lower than the previous nine-year average rate of 196 per 100,000 persons.

DOMESTIC ABUSE

A person commits the offense of **domestic abuse** if he/she: (a) purposely or knowingly causes bodily injury to a family member or household member; or (b) purposely or knowingly causes reasonable apprehension of bodily injury in a family member or household member.

A total of 3,170 cases of domestic abuse and attempted domestic abuse was reported to Montana law enforcement officials in 1994. As can be seen in the chart above the trend continues to climb upward since 1988. The chart reflects an annual average increase of about 18% from 1988 to 1994.

Sixty-seven percent (67%) of the reported domestic abuse cases were cleared by arrest or by exception in 1994, compared to a similar rate of 66% in 1993.

The 1994 incidence of domestic abuse in Montana was 387 domestic abuse cases or attempts per 100,000 persons as compared to 294 per 100,000 in 1993.

TABLE 1 1994 SUMMARY OF OFFENSES KNOWN TO LAW ENFORCEMENT IN MONTANA

| | Offenses | Cleared | Percent |
|-------------------------|-----------|-----------|----------------|
| | Reported | By Arrest | Cleared |
| | 1994 | 1994 | By Arrest |

JUVENILE STATISTICS Reported to the Juvenile Probation Information System

Introduction

The Juvenile Probation Information System (JPIS) was started by the Montana Board of Crime Control in the early 1970's. The primary purpose of the JPIS system was to serve as a central collection point for statistical data relating to juveniles in the criminal justice system. Prior to 1993 the MBCC was collecting data from 90% of the Juvenile Probation Offices around the state of Montana. Crime in Montana annual reports summarized and reported this data in as fair a manner as possible.

During 1993 a new case management/data collection program was provided to all Juvenile Probation offices throughout Montana. 1993 was a banner year in that 100% of the Juvenile Probation Offices were reporting statistical data to the MBCC.

A note of caution to all who use this document to report juvenile criminal activity in the state. Since the MBCC now has 100% reporting, comparative analysis with prior years may show major data discrepancies. As an example, in prior years there have been an average of about 4,500 juveniles appearing in Juvenile Probation offices. The figures for 1993 and 1994 show an average of 9,247 youth who have been processed through this same system. This increase is due to an improved reporting base and does not reflect an increase in the overall caseload of the system. Therefore, care needs to be taken when comparing data from one year to another.

Based on this improved reporting base the data analysis that follows will be directly aimed at 1993 and 1994 with limited prior year comparisons. When comparisons are made it will be done mostly on the basis of percentages and not whole numbers.

Montana's Juvenile Justice System

Montana's Juvenile Justice System allows youth to be given consideration not available to adults and, at the same time, denies them some of the constitutional rights adults have. The Youth Court is part of each District Court, but operates as a civil rather than a criminal process. In Youth Court, for example, juveniles are "referred" rather than "arrested" or "charged". They are found to be "delinquent" or "in need of supervision", but are not "convicted" of specific crimes, and, they are "disposed" rather than "sentenced".

A youth may be found to be delinquent only if he/she has committed an act which is criminal for an adult. Burglary, assault, or shoplifting can all lead to a finding of delinquency. A Youth in Need of Supervision (YINS) is a youth who has committed non-criminal acts such as running away, being "ungovernable" or violating curfew. These are only "crimes" because of the youth's age. They are commonly referred to as "status" offenses.

General Activity

The activities of Montana's Youth Courts and Juvenile Probation Offices is typically measured in four components:

- 1. The Number of Cases the number of individual youth who become involved with the juvenile justice system for some reason, criminal or not. The number of cases processed by Youth Courts in Montana in 1993 reached 8,650, and in 1994 increased to 9,844. About two-thirds of the cases were males (68%).
- 2. The Number of Referrals the number of youth encounters with the juvenile justice system. An individual can be referred more than once during the year. In 1993, Youth Courts and Probation Offices handled 12,847 referrals, and in 1994 there were 14,505 referrals. In any referral, a youth may be charged with more than one crime. However, most youth are referred because of a single crime.
- 3. The number of Offenses the number of crimes attributed to youths who have been referred to the system. In 1993, Montana had 15,992 criminal and status offenses reported to probation offices which were attributed to juveniles, and in 1994 this figure rose to 16,813.
- 4. The number of detentions the number of times youths are confined awaiting court action. Counties have established regional detention programs in response to state and federal requirements to not hold juveniles in adult facilities. Those programs provide both secure and non-secure detention. In some rural areas, juveniles are still detained in adult facilities (held separately from the adult inmates) for up to twenty-four hours. Any juvenile requiring detention beyond the twenty-four hour period are transferred to one of the regional detention centers. During the course of a year a single youth may be confined more than once.

Just over seventy percent, 72.7% in 1993 and 73.6% in 1994, of the youth involved with the probation system were involved a single time during the year. Fifteen percent (15%) had two referrals, and eleven percent (11%) had more than two referrals during 1993. The distribution is fairly static over the past several years. Nevertheless, the overwhelming majority of Montana's youth who have had an encounter with the system, have only one such encounter.

Referrals by Age and Sex

The rate of referral for each age and sex can be used to identify critical age/sex groups and predict potential changes in Youth Court activities.

The age/sex pattern for delinquent crimes in Montana appears to follow national statistics. Comparing Montana's juvenile referrals to the national juvenile arrest statistics it is found that within each age bracket the percentage of youth committing crimes are comparable.

PERCENTAGE OF CRIMES COMMITTED BY AGE

| Female | 00.84 | 0.4.34 | 041105 |
|--------------|--------|--------|--------|
| Age Bracket | 93 Mt | 94 Mt | 94 UCR |

93 UCR statistics compiled from the 1993 "Crime in the United States"

Ethnic Origin - Juveniles

Patterns for ethnic origin of juveniles referred to the Youth Court System have remained constant over the years. The following figures represent the total ethnic origin over the past two years.

| | 1993 | | 1994 | |
|-----------|-----------|------------|-----------|------------|
| Ethnic | Referrals | Percentage | Referrals | Percentage |
| Caucasian | 10,565 | 82.2% | 11,818 | 81.5% |
| Black | 78 | 0.6% | 109 | 0.8% |
| Indian | 1921 | 14.9% | 2186 | 15.1% |
| Spanish | 182 | 1.4% | 212 | 1.5% |
| Other | 101 | 0.8% | 180 | 1.2% |

Source of Referral

Law enforcement authorities are the primary referral source for delinquent youth in Montana. In 1994, police departments and sheriff's offices accounted for 95% of delinquent referrals. Over the years, local law enforcement has traditionally provided the bulk of referrals to the juvenile justice system. The remaining 5% is composed of a wide variety of referral sources including the State Department of Fish, Wildlife and Parks, other courts, parents, and school officials.

Law enforcement was responsible for 87.8% of the status referrals. The Montana Highway Patrol and Courts appear to be responsible for a slightly larger percentage of status referrals over delinquent referrals.

Offense Categories

Currently Offenses are divided into seven major categories.

- 1. Crimes against persons include criminal homicide, forcible rape, sex crimes, robbery, family crimes, and assault. In 1994, the juvenile justice system identified 2,141 crimes against persons.
- 2. Property crimes include burglary, larceny, motor vehicle theft, arson, vandalism, receiving and possessing stolen property, and trespassing. In 1994, Montana youth were charged with 6,774 property crimes.
- 3. Offenses against the public order include weapon offenses, sex offenses, driving under the influence of intoxicants, disorderly conduct, traffic crimes, and court and justice system offenses (escape, contempt, and probation violations). In 1994, 1,032 offenses against public order were processed.

- 4. Offenses against public administration include false reports to law enforcement, obstructing justice, resisting arrest, and others. In 1994, Montana youth were charged 822 times for public administration violations.
- 5. Status offenses include these offenses which strictly pertain to juveniles. They include runaways, curfew violations, ungovernable, and liquor violations. In 1994, there were 3,697 status offenses in Montana.
- 6. *Drug offenses*. In 1994, 826 offenses were listed for substance abuse in Montana.

As indicated above, most juvenile referrals in Montana are primarily for property crimes (40.3% in 1994) or for status offenses (21.9% in 1994). Referrals against public order accounted for 6.1%, public administration for 4.9%, and crimes against persons for 12.7%. Drug offenses were involved only 4.9% of the time.

Referral Offenses

Nearly 80% of all delinquent referrals in 1994 are made up of only 10 different types of delinquent offenses.

Although many of the most frequently committed offenses are the same for either sex, the ranking is different. The most common reason for a juvenile to appear in youth court is misdemeanor theft. Misdemeanor theft accounted for 21.1% of the male offenses and 18.9% of the female offenses. The most common violent crime is simple assault. It accounts for 5.9% of the male referrals and 4.9% of the female referrals.

The 1994 statistics for drug offenses show that male misdemeanor possession is mid-range for the offense frequency accounting for 244 of the total offenses. Females charged with misdemeanor possession is lower in frequency with a total of 85 offenses.

The Number of Detentions and Their Trend

The number of pre-trail youth detentions which occurred in Montana during the last eight years can be separated into the major types of offenders - status offenders and delinquents. In both cases, the number has dropped dramatically in recent years. The total number of youth detentions in 1993 was 479 compared to 587 in 1994.

Status offenders are legally detained for up to 24 hours (excluding holidays and weekends) in non-secure programs. These holds are normally necessary to allow time for investigation, notification of parents, or awaiting placement or transport to another program or locality. Less than 10% of the detentions involved status offenders. JPIS no longer identifies the specific status offense involved in juvenile detentions. However, in the past, slightly over half of these status offenders were runaways. Two

thirds of the status offenses involved the youth being detained 24 hours or less. Half of the youths detained more than 24 hours were referred on a Friday, Saturday or Sunday.

Twenty-eight percent (28%) of the youths detained for delinquent acts stayed less than 24 hours and 40% of the youths staying more than 24 hours were taken in on a Friday, Saturday, or Sunday.

For those staying more than 24 hours the average length of stay was 6.5 days.

Disposition of Juvenile Offenders

Considering that 80% of the youths appearing before youth court are first offenders, the punishment meted out by the court seems appropriate. Overall, it seems there is a bias toward leniency. Almost half of the delinquent referrals are handled informally. Over 17% of these cases resulted in a warning, and 19.9% resulted in probation. In 5.3% of the cases the youth had to make restitution.

TABLE 8 1994 SUMMARY OF JUVENILE OFFENSES

| REASON FOR REFERRAL | NUMBER OF OFFENSES | PERCENT |
|---|-----------------------|----------------------|
| STATUS OFFENSES | | |
